### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1,2,4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ward et al. or Merriman (US 4146271; 5029943) in view of German document (DE 10207698).

Ward et al. and Merriman both disclose a longwall support control comprising a central control system (22, 28), plurality of control units (20,23), mining shield control device, at least one bus line (23, see Fig. 3), code word (see col. 6 line 5+, col. 4 line 60 thru col. 5 line 5). However, they are both silent about including a second bus line. German document teaches having a second bus line (see title). It would have been considered obvious to one of ordinary skill in the art to modify either Ward et al or Merriman to include a second bus line as taught by German document in order to provide feedback to an end user.

3. Claims 1,2,4 are rejected under 35 U.S.C. 103(a) as being unpatentable over British document (GB 2167924) in view of German document (DE 10207698).

British document discloses a longwall support control comprising a central control system (see Figures), plurality of control units (see Figures), mining shield control device, at least one bus line (see Figures), code word (see abstract). However, British

document is silent about including a second bus line. German document teaches having a second bus line (see title). It would have been considered obvious to one of ordinary skill in the art to modify British document to include a second bus line as taught by German document in order to provide feedback to an end user.

#### ***Response to Arguments***

4. Applicant's arguments with respect to claim 1 have been considered but are moot in view of the new ground(s) of rejection.

#### ***Conclusion***
